

Cover Letter

Dear Hiring Manager,

I am writing to express my interest in the Tech role at your esteemed organization. Having spent over a decade deeply involved in a wide array of technology domains, I believe I am well-equipped to navigate the intricacies of not only mainstream software development but also emerging blockchain and Web3 paradigms.

In addition to my robust experience developing e-commerce sites, Fintech and AdTech platforms, and popular Social Media platforms, I have also ventured into freelancing on platforms like Upwork and Fiverr. I've even explored the commercial side of things by selling scripts on Envato's Codecanyon.net.

A significant portion of my professional journey has also been dedicated to blockchain-related activities. I possess a strong foundation in Web3 protocols, tokenization strategies, and crypto wallet systems. This understanding aligns seamlessly with my skills in crafting Databases, APIs, and designing User-centered Experiences. Moreover, I am adept at ensuring the smooth integration of these blockchain elements into more traditional systems.

Technically, I am proficient in a multitude of programming languages and tools: Laravel-PHP, various database systems like MySQL, Vue Js, React Js & React Native, Node Js, TypeScript, JavaScript, Tailwind CSS, and the Ionic Framework, to name a few. On top of these, my experience extends to containerization with Docker, orchestration using Kubernetes, and cloud platforms such as AWS, Digital Ocean, and Google Cloud. I'm also well-versed with operating systems development across Android, iOS, MacOS, Windows, and Linux, and have a sound practice of version control with platforms like GitHub.

My experiences have honed my ability to either spearhead projects independently or collaborate within a team structure seamlessly. Recognized for my organization skills, attention to detail, and astute problem-solving abilities, I am passionate about bringing these attributes to your team.

As the worlds of traditional tech and blockchain converge, I am enthusiastic about the possibility of contributing meaningfully to your projects that sit at this nexus. Thank you for considering my application, and I eagerly await the opportunity to delve deeper into how I can serve your organizational goals.

Recent Projects:

- <https://fitfind.us/> - Gym and fitness finder – Built using Laravel 10, Inertia, Vue 3 and Tailwind CSS – With Mobile App using Ionic Framework and Vue.
- <https://strataly.com> – Blockchain Real Estate – Built with Stellar, BSC, Web3, Firebase, Laravel, Vue 3 and Tailwind CSS – With Mobile App using Vue.

FRANCIS JAYEOLA

PROFILE

A seasoned Backend Developer with over a decade of expertise spanning from e-commerce sites, Fintech and AdTech platforms to the design of Search Engines/Web Browsers and Social Media platforms. Additionally, my portfolio extends to freelance projects executed on platforms like Upwork and Fiverr, as well as commercial ventures involving script sales on Envato's Codecanyon.net.

Diving deeper into the rapidly evolving realm of blockchain and Web3, I have cultivated a robust understanding of tokenization strategies, Web3 protocols, and crypto wallet system integrations. My foundational knowledge in creating efficient Databases, API development, and crafting User-centered Experiences seamlessly integrates with blockchain-based applications.

With profound knowledge in a myriad of frameworks, I take pride in my capability to oversee end-to-end software development cycles, establish robust systems architecture, and optimize applications for utmost performance and scalability. As the fusion of conventional tech and blockchain accelerates, I stand poised to bridge these domains with proficiency and innovation.

KEY SKILLS

- Laravel - PHP
- MySQL
- Vue Js
- React Js and React Native
- Node Js
- TypeScript
- JavaScript
- Tailwind CSS
- Ionic Framework
- Electron Js
- Docker and Kubernetes
- Web3, Blockchain.
- AWS, Digital Ocean, Google Cloud
- Android, iOS, MacOS, Windows and Linux OS development
- GitHub

PROFESSIONAL EXPERIENCE

Date: April 2019 – Present (Part-time Contract)

Employer: ProveHub Ltd (UK)

Position: Creative Full Stack Developer

Responsibilities:

- Web3, Blockchain applications including wallet systems.
- Developed web apps in JavaScript, Vue and React.
- Planned web app development to aid the transformation of figma mock-ups into functional web presence and front-end with Tailwind CSS.
- Used frameworks like as WordPress, Laravel (Livewire, Alpine Js), and Node Js to provide back-end web apps
- Managed Node Js back-end development to preserve the efficiency, security, and integrity of web platforms.
- Used Ionic Framework alongside Vue Js to develop hybrid mobile applications including Android and iOS.
- Used Electron Js to develop desktop applications for Windows, Mac and Linux operating systems.

Date: November 2014 – Present

Employer: AdNaira Ltd

Position: Full stack Web Developer

Responsibilities:

- Lead my team and also collaborated with other team members.
- Contributed in building Ad server technology to implement cookie and other ad tracking technologies.
- Coded updates to detect fraudulent actions on the part of web publishers.
- Ongoing efficiency and security upkeep and patching on the website interface were provided to keep it functional after launch.
- Creatively innovated faster ad load times in milliseconds to improve ad loading speed.
- Reinforced and automated cron jobs and all manual processes to reduce administrator's work on management of the web platform.
- Implemented Newsletter systems to handle deliverability issues and avoid spam.

Date: December 2013 – June 2020

Employer: TrophyHost Ltd.

Position: Creative Web Developer

Responsibilities:

- Lead my team and also collaborated with other team members.
- Handled various server to effective share among web hosting users.
- Took part in configuring DNS for client domain and activation.
- Implemented some third-party security tools such as Cloudflare, Sitelock, Stack Path, Comodo.
- Ensured SSL are properly configured and renewed on time to remain compliant with various browsers.
- Established presentation uniformity throughout the standard browser interfaces of Chrome, Safari, Firefox, and others.
- Maintained content management systems that are based on the server.

Date: April 2011 – March 2018

Employer: Jafxnet Creative Technologies Ltd

Position: Full stack Web Developer

Responsibilities:

- Lead my team and also collaborated with other team members.
- Worked on projects needing core Java language alongside Android studio.
- Used Apple Swift IDE in developing basic iOS applications.
- At some point had to learn C# to work on Windows platforms.
- Tested and evaluated the website's design for usability, clarity, and effectiveness.
- Building and designing fresh, mobile-friendly websites while converting old, difficult-to-use displays.
- Multitasked across many roles and activities to produce project results, fulfil deadlines, and uphold corporate standards.
- Functional testing was done throughout the web development process.
- Determining the code specifications needed for eCommerce functionality, security, and customized scripts.

EDUCATION & TRAINING

Federal University of Technology Akure | 2013 – 2018

Akure, Ondo State, Nigeria

Bachelor of Technology, Agricultural Extension and Communication Technology.

Citadel International College | 2001 – 2007

Ikare, Ondo State, Nigeria

WAEC (Equivalent of UK A-Level's +8 GCSEs).

INTERESTS & ACTIVITIES

Travelling. Reading. Swimming and Gaming
